Obituary

In Memoriam

In loving memory

FRANCIS MUNDUBA MUNGU
 Born: 02-17-1938
 Died: 05-12-2016

Today marks exactly seven years of your untimely departure to eternity. Your absence is deeply felt and immeasurable hence the loving and parental memories you left within and amongst the entire family and friends, physically we miss you but spiritually and emotionally we are together dearest father. We wholeheartedly miss you daddy, brother, uncle, grandfather, son and friend.

May the almighty Lord continue protecting your soul, forever and ever, Amen!!

MINUTES OF PUBLIC CONSULTATION MEETING:

ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENSE (EPL) No. 7616 LOCATED EAST OF UIS, IN THE ERONGO REGION, NAMIBIA.

Date: Friday, 09 February 2024

Time: 12h12 – 13h25

Venue: Uis Community Hall

The public consultation meeting was attended by 8 people, including 1 Environmental Consultant and an Archaeologist from Excel Dynamic Solutions (Pty) Ltd (EDS) - **Please refer to the attached attendance register.**

INTRODUCTION AND WELCOMING REMARKS

Mr. Mandume Leonard (Environmental Consultant) opened the meeting with a short introduction of the team, who they are, and the purpose as to why they are consulting affected parties of the proposed prospecting and exploration activities on EPL 7616. He also introduced Mr. Stefanus Nambili a representative from Capstone Mining (Pty) Ltd. Mr. Mandume Leonard circulated the meeting attendance register for the attendees to write down their names, contact details, and sign so that they could be added to the list of interested and Affected Parties (I&APs) and receive further information on the ESA process.

MEETING AGENDA AND PRESENTATION

The agenda of the meeting included the following main points:

2.1 Brief Description of the Project

Mr. Mandume Leonard explained the Environmental Scoping Assessment (ESA) process and the reason why the Proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), an independent Environmental Consultant to carry out the ESA and apply for the Environmental Clearance Certificate (ECC).

2.2 Explanation of what an ESA is, its Process, and the Public Role in the Process

Mr. Mandume Leonard explained to the attendees what the meeting was all about and why they were invited (with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation). Mr. Mandume Leonard further explained what an ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an ECC from the Environmental Commissioner.

2.3 Presentation of Potential Project Impacts

To ensure transparency and that the attendees understand both sides of the proposed project activities, the Environmental Consultant also presented the potential pre-identified potential positive & negative environmental and social impacts. He presented the Background Information Document (BID) to all the attendees whereby he explained in detail all the information in the BID.

2.4 Public Open Discussion (Interactive Session)

Mr. Mandume Leonard provided the meeting attendees the opportunity to raise their concerns/issues and/or comments on the proposed project activities. The issues and comments recorded are presented in **Table 1** below.

Table 1: Comments and issues raised during the public consultation meeting, 09th of February 2024

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
1.	<p>Commenter 1: Where exactly is the EPL located?</p> <p>Will there be another meeting since the EPL is far from here? There may be other people on the other side of //Masbank who would need to be briefed.</p> <p>How many meetings should be conducted before an ECC is obtained?</p>	<p>Mr. Mandume Leonard (ML): The EPL is located on the side of //Masbank.</p> <p>Mr. ML: Since, after the meeting, we will be going to do an archaeological assessment, we will drive by the villages and we will meet with the people at those villages and surroundings. Before this meeting, we have contacted the headman and the chief of this jurisdiction. Furthermore, we will consult the headman and the chief by briefly explaining about the proposed development and what the future holds for the project.</p> <p>Mr. ML: This is the first public consultation meeting we are conducting for the renewal of the EPL. Once an ECC is obtained, the Proponent will be required to conduct a meeting to discuss access agreements with the affected parties before any activities can occur on the ground. Overall, about more than one meeting can occur before an ECC is granted, but this depends from project to project.</p>

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
	<p>How will community members access the EPL area, if want to go and observe for themselves?</p>	<p>If valuable minerals are found on the EPL, and mining operation is foreseen the same process of public consultation meetings will be conducted for the Mining license.</p> <p>Mr. ML: The EPL is accessible through the coordinates presented in the BID.</p> <p>However, when the drafts (Environmental Scoping Assessment (ESA) report and the Environmental Management Plan (EMP)) are shared to all parties, for review and comments. One can issue comments for incorporation in the final report, if the findings presented in the drafts are not accurate to what parties have observed on the ground for themselves.</p>
<p>2.</p>	<p>Commenter 2: The EPL is in the communal area, and the attendance of the meeting is low. I'm concerned that more people would be aware of the EPL in the area.</p>	<p>Mr. ML: As stated before, relevant authorities were consulted to inform them about the public consultation meeting. The meeting was scheduled to take place in Uis to accommodate all parties.</p> <p>However, all affected parties such as //Masbank and the rest of other identified villages will be consulted, after this meeting.</p>

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
	<p>What will happen to the affected parties once an ECC is obtained? Most exploration and mining companies have left negative impacts behind, without rehabilitating the area.</p>	<p>Mr. ML: The comment is well-noted sir.</p> <p>The proponent is not allowed to conduct their own Environmental Impact Assessment (EIA), an independent consultant should be appointed.</p> <p>Once an ECC is acquired, the proponent is required to consult the affected parties on access agreement and its terms and conditions, before any activities can occur on site.</p> <p>Sadly, its notable that some mining companies ignore their responsibilities and that is not how things should work.</p> <p>In case the proponent digs trenches and drill holes, the proponent is required to fence off the area for the safety of the animals and the people, and rehabilitated.</p> <p>Mr. Stefanus Nambili (Proponent): The unskilled workers from Uis will be prioritized, and positions will be advertised through following the right procedure, to ensure that employment procedures are conducted in a non-political manner.</p>
<p>3.</p>	<p>Commenter 3: The proposed project is a good development for the communities, as long community member will not be exploited.</p>	<p>Mr. Mandume Leonard: Noted sir.</p>

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
	<p>A large part of the EPL falls within the Tsiseb Conservancy area, and more should be informed through different means of communication. To ensure that this meeting is well represented.</p> <p>In terms of job creation, it is impossible that only people from Uis will be employed, how the HR is set-up they are not limits who should be employed. Anyone from any town would be able to apply by modifying their CVs to portray that they are from Uis.</p> <p>It is advisable that the Uis Liaison Officer is consulted, to spread any news around.</p>	
4.	<p>Commenter 4: It is important that skills are transferred from the skilled workers to the unskilled workers (indigenous people) in the area. In the past there has been a lack of skills transfer from the skilled workers.</p> <p>Is there any mode of communication to be used during public consultations? Some mode of communications are not effective to the locals, as some do not listen to radio, have access to appropriate telecommunication devices (i.e. WhatsApp) or read Newspapers.</p>	<p>Mr. ML: Noted. The communities and the public were informed about the meeting. Posters were placed at U-save Mall, and communication were made with conservancy representatives and settlement officials, to sensitize the public and community members about the public consultation meeting.</p> <p>Noted. The public were consulted and communicated as per the Environmental Management Act (EMA).</p>

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
5.	<p>Commenter 5: When providing information to localized authorities or representatives, it is important that they should be sensitized to announce the information in churches, on the radio or other means of communication to reach as many people as possible.</p> <p>It is important that the Consultant should Also, if possible, let us try to get a translator from English to Afrikaans or Damara and vice-versa, to accommodate the local people</p> <p>The concern remains as to what will be the focus of the proponent after getting an ECC, for the benefits of the communities We would like to know what the proponent will focus on in terms of CSR among others. The main important thing about us is for us to talk to us about the whole exploration project and if you decide to come back for mining, to let us know.</p>	<p>Mr. ML: Noted. Normally, when a meeting is conducted in a village or settlement a translator is used to translate from English to an indigenous language and vice-versa.</p> <p>We usually inform the traditional leaders to reach out to locals, we take note of your advice and in the future, other means of communication as per your proposal, will be taken into account.</p> <p>The Proponent: Noted. Capstone Mining (Pty) Ltd has policies in place with regards to community relations and the project. At this stage, we are not sure if there are sufficient minerals in the area. It is a matter of prospecting and conducting mineralization. If the results are promising, then we move to the next stage (mining).</p> <p>After the ECC is issued, the proponent will consult the traditional authority, and affected locals, for land access agreement.</p>
6.	<p>Speaker 6: Will Community members get benefits directly from the Proponent without going through the traditional authority?</p>	<p>The Proponent: For the benefit for the entire community, we will not give mere 'benefits' to individual community members, but embark on community projects for short and long-term benefits for the community. We will not give out handouts to community members. We will work with the traditional authority</p>

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
	<p>Commenter 3: Traditional authorities and councilors has piles of CVs of community members of different projects (Green Hydrogen, road projects, etc.) without any member of the community being shortlisted.</p>	<p>in identifying potential community projects that requires attention, such as roads rehabilitation, drilling boreholes projects, etc.</p> <p>It is also the responsibility of the community members to keep their community headmen and representatives in check and suggest projects worth pursuing.</p>
<p>7.</p>	<p>Commenter 6: It is best that the Proponent communicate directly with the youth, and empower the youth by giving them community projects to run.</p> <p>Will there be another meeting after this meeting?</p>	<p>The Proponent: Noted. It is a matter of finding out who is in charge of community affairs.</p> <p>Mr. ML: Yes, before commencement of exploration activities, there will be another meeting between the Proponent and the communities</p>
<p>8.</p>	<p>Commenter 3: Is the Chief aware about todays meeting (09 February 2024)?</p> <p>How many farms is covered by the EPL?</p>	<p>Mr. ML: Yes.</p> <p>Mr. ML: The EPL does not cover any farm, however, it covers conservancies, such Tsiseb Conservancy, Ohungu Conservancy, and Okombahe reserve.</p>

FINAL REMARKS AND CONCLUSION OF THE MEETING

Mr. Mandume Leonard thanked the attendees for their crucial input through comments and raising their concerns. He indicated to the attendees that all their comments, concerns and inputs have been noted down for consideration and will be incorporated in the Environmental Scoping Assessment (ESA), and respective recommendation measures will be outlined in the EMP draft.

Furthermore, Mr. Mandume Leonard informed the attendees that the public consultation meeting minutes draft, ESA, and EMP will be shared with attendees for reviewing, and for further comments. These documents will be made available through the emails provided on the attendance register.

Once the review of the drafts are completed, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration of an ECC.

The meeting adjourned at 13h25.
